Put Moisture Back Into Your Indoor Air.

Bryant Has The Solution

Designing and manufacturing top-quality home comfort equipment and offering reliable home comfort solutions are just a few of the reasons Bryant is the most trusted name in the home comfort industry. Our national network of knowledgeable Bryant dealers help homeowners choose indoor comfort equipment that best fits their specific needs. If you're feeling the discomfort dry air can cause, your local Bryant dealer can solve your comfort problems with one of the models from our complete line of humidifiers.

WARRANTY

Bryant protects your comfort with written warranties. Electrical components are covered by a **five-year limited warranty** and the entire unit is backed with a **one-year limited warranty**. Extended warranties are also available. Ask your local Bryant dealer for details.

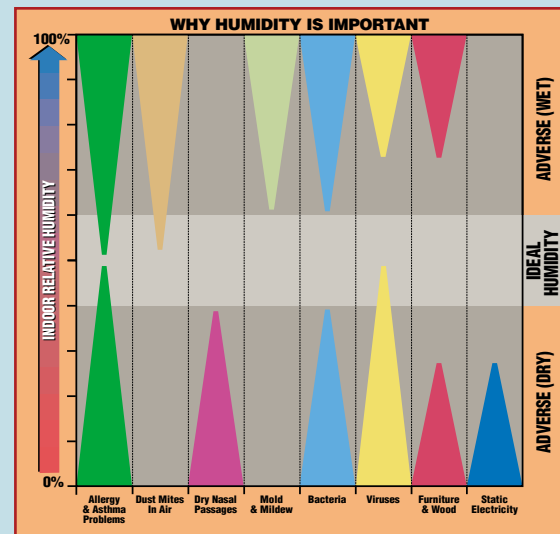

Enjoy The Soothing Benefits Of A Bryant Humidifier.

As part of Bryant's indoor air quality strategy of Control, Filter, and Refresh, controlling your indoor humidity is very important! You may not realize this, but in many cases, the air inside your home is drier than a desert. Dry, indoor air is often the culprit for such common problems as itchy or cracked skin, eye irritation, dry, stuffy nasal passages and damaged home furnishings in your home. In addition to these comfort issues, dry indoor air can increase the possibility of catching or transmitting cold and flu viruses and can reduce the efficiency and effectiveness of your heating system. All of these problems can be alleviated with the help of a Bryant humidifier. Offering five different humidifiers, Bryant puts the moisture back into your indoor air so you can relax in warm, soothing comfort.

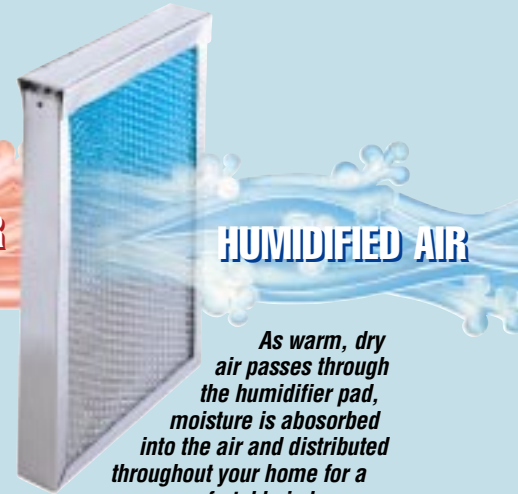

A Bryant humidifier helps prevent damage to your furniture such as dry, cracked wood, protecting your furnishings for years.

Maintaining ideal humidity in your home can be the key to relief from dry nasal passages, static electricity, and dry, itchy skin. Proper humidity control is also important for minimizing the growth of bacteria, molds, viruses and dust mites.

DRY INDOOR AIR

HUMIDIFIED AIR

As warm, dry air passes through the humidifier pad, moisture is absorbed into the air and distributed throughout your home for a more comfortable indoor environment.

Prevent static electricity cling and shocks in the winter time by installing a Bryant humidifier in your home.

on For Dry Indoor Air.

Built-In Reliability.

1 WATER HOOK-UP AND ELECTRICAL COMPONENT

Are linked to precisely measure and control moisture distribution.

2 CERAMIC COATED EVAPORATOR PAD

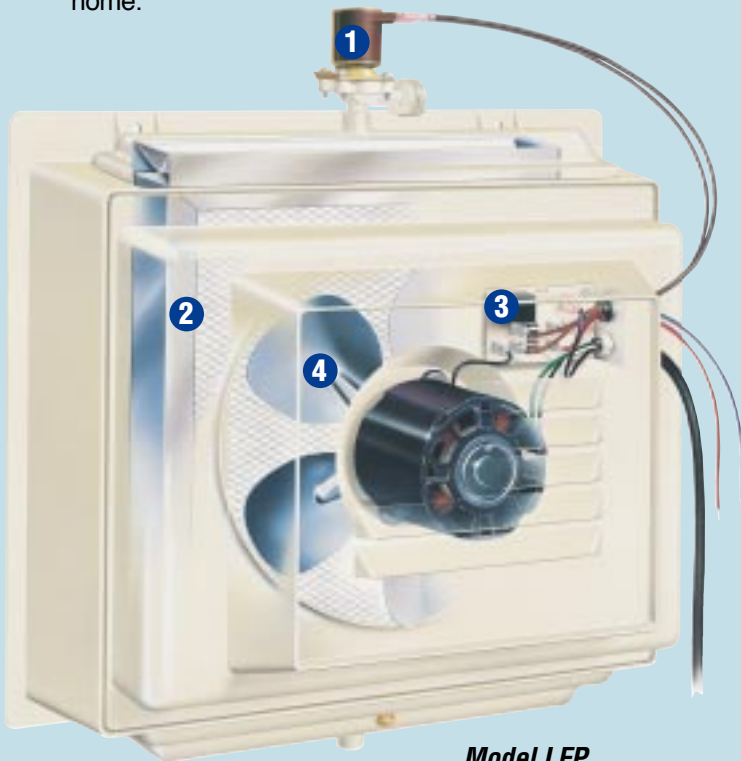

Holds moisture that becomes water vapor to humidify your home.

3 SOLID STATE CONTROL BOARD

Maintains accurate water flow.

4 MULTI-BLADE FAN (fan-powered models)

Forces air through the evaporator pad to help turn water

Model LFP

Bryant Has The Humidifier That's Right For You.

With five humidifier models to choose from, Bryant offers a full lineup of models designed to meet your needs.

SBP

- Delivers up to 17 gallons of moisture per day
- Reliable, treated expanded aluminum pad
- 24-volt operation

LBP

- Delivers up to 18 gallons of moisture per day
- Precise water control
- Low maintenance
- Reliable, treated expanded aluminum pad
- 24-volt operation

SFP

- Delivers up to 16 gallons of moisture per day
- Easy maintenance
- Low speed fan operation
- Reliable, treated expanded aluminum pad
- Built-in AC/DC control board
